

**Silentia+**  
***SALICE***

The state of the soft-close art.

Silentia+ allows a perfect and constant closing of the door in any condition, use and application.

The innovative soft-close technology guarantees excellent performances to the complete range of hinges. Silentia+ includes numerous technological elements in the required spaces and maintains the aesthetics of the hinges of the first generation.

## Second generation

Integrated soft-close technology with two silicone oil dampers.

The two integrated dampers guarantee an exceptional regularity of the decelerating strength providing a perfect closing to any kind of door and condition.

## Ever-optimal soft-close action

Silentia+ is also equipped with the innovative switch to delay the decelerating action. The activation of this switch allows, even to special doors, to obtain the ideal decelerating strength.

## The tradition

Range, kinematics and adjustments remain unchanged and ensure once again the most comprehensive offer available on the market.

Silentia+ does not require any change of mounting plates.

	DESCRIPTION	FIXINGS			
	<p>Series 100. Hinges for doors of small weight and reduced thickness. 12 mm cup depth.</p>				
	<p>Series 200, for thicker doors. Hinges for min. 18 mm thick doors. 15.5 mm cup depth.</p>				
	<p>Series 700. Hinges for min. 16 mm thick doors. 13.5 mm cup depth.</p>				
	<p>Series 200, 155°, 0 protrusion.</p>				
	<p>Series 300. Hinges for display cases and cabinets with wooden or metal pilasters.</p>				

## More technology in the same spaces

Silentia+ has identical dimensions and shape as the previous generation, in spite of the new double-piston technology and the deceleration switch.

These features allow the complete interchangeability both inside the cabinet and during the drilling process and the insertion on the door.
